

The image shows a screenshot of a C++ IDE with a code editor on the left and a console/output window on the right.

Code Editor:

```
#include<iostream>
using namespace std;

int GCD(int n, int m){
    // 請實作GCD遞迴函式
    return m==0 ? n:GCD(m,n%m);
}

int main(){
    // ...
    int n,m;
    while (cin>>n>>m){
        cout<<GCD(n,m)<<endl;
    }
    return 0;
}
```

Console/Output Window:

The window title is "李承穎41443114". It shows the output of the program:

```
40個，203字元。
8-SAME
[TA自編題目_112下-28] GCD:
...
Microsoft (R) Incremental Linker Version 14.0
Copyright (C) Microsoft Corporation. All rights reserved.
/out:main.exe
main.obj
```

Below the output, there are input fields for "標準輸入串 (stdin)" and "您的輸出串 (stdout)". The "您的輸出串 (stdout)" field contains the text "Microsoft Test Data".

The screenshot displays a Windows IDE environment with the following components:

- Top Menu Bar:** Includes options like 'File', 'Edit', 'View', 'Tools', 'Window', 'Help', 'Run', 'Debug', 'Build', 'Test', 'Tools', 'Window', 'Help'.
- Code Editor:** Contains a C++ program for binary search. The code is as follows:

```

16 mid=(right+left)/2;
17 if(arr[mid]==target)
18     return mid;
19 else if(arr[mid]<target)
20     left=mid+1;
21 else
22     right=mid-1;
23 }
24 return -1;
25
26 }
27
28 int main() {
29     int n;
30     cin>>n;
31     while(n--){
32         int m;
33         cin>>m;
34         int *capoo=new int[m];
35         for(int i=0;i<m;i++){
36             cin>>capoo[i];
37         }
38         test(capoo, capoo+m,

```
- Output Window:** Displays the program's execution output, showing the array and the target value.

```

Output
mid=(right+left)/2;
if(arr[mid]==target)
return mid;
else if(arr[mid]<target)
left=mid+1;
else
right=mid-1;
}
return -1;
}

int main() {
int n;
cin>>n;
while(n--){
int m;
cin>>m;
int *capoo=new int[m];
for(int i=0;i<m;i++){
cin>>capoo[i];
}
test(capoo, capoo+m,

```
- Right Sidebar:** Shows the project structure and the output of the compilation process.
 - Project Structure:**
 - 李承穎41443114
 - main.cpp
 - Microsoft (R) Incremental Linker Version 14.0
 - Copyright (C) Microsoft Corporation. All rights reserved.
 - /out:main.exe
 - main.obj
 - Output:**
 - 李承穎41443114 (TA自編題目 112下-26) Binary Search :
 - 程序編譯成功。該程序是由內存和磁盤資源所產生。編譯過程所產生的輸出文件正在注冊查看。特此提示。

/out:main.exe
main.obj

編譯器測試

設置輸入 輸入區放大 輸入區縮小

標準輸入串 (stdin)

您的輸出串 (stdout) 正確輸出串 (stdout) (C:\ProgramData\Microsoft\Visual Studio\14.0\VC\bin\amd64\cl.exe)

您的錯誤串 (stderr) 正確錯誤串 (stderr)

您的輸出 您的錯誤

預覽測試, 故不顯示

您的輸出 正確輸出 您的錯誤 預覽測試

題意:

第一行有一數字N, 且接著會有N行, 每行以數字S開頭, 並緊接著要求輸出陣列A的反轉。

```
#include<iostream>
using namespace std;
int main()
{
    int N;
    if (cin>>N)
        return 0;
    while (N--){
        int S;
        cin>>S;

        int A[1000];
        for(int i=0;i<S;i++){
            cin>>A[i];
        }

        cout<<" ";
        for(int i=S-1;i>=0;i--){
            cout<<A[i]<< (i==0? "" : " ");
        }
    }
}
```

The screenshot displays a C++ IDE with the following components:

- Top Bar:** Shows the file name "TA 自編題目_112下-15練習 Ackermann's Function" and the active window "隨機測試(RandomTest0)".
- Code Editor:** Contains the C++ implementation of the Ackermann function. The code uses a namespace and a recursive function `A(m, n)` that returns values based on the conditions `m == 0`, `m > 0 and n == 0`, and `m > 0 and n > 0`. The `main` function reads two integers `m` and `n` from the user and prints the result of `A(m, n)`.
- Output Console:** Shows the program's execution. It prompts for input, receives "41443114" for `m` and "59" for `n`, and outputs "371元" (371 Yuan).
- Right Panel:** Displays the project's file structure, including "main.cpp" and "main.obj". It also shows the compiler's output, which includes the copyright notice for Microsoft Visual Studio 14.0.
